

Poster Presentation Guidelines for ISDC 2018

Each team (or individual) attending the International Space Development Conference is expected to present a formal poster at the ISDC Space Settlement Student Design Contest Poster Session. In order to present a poster you and/or your team must register for a slot, as spaces are limited upon registration. Due: May 11, 2018.

This poster session will be divided into sessions. Your team/individual will be assigned a presentation group, day and location. The information for the group, day, time and location for the Poster Presentation will be given at the Registration Desk.

Poster Requirements

- The Poster Presentation should highlight each team's project as submitted to the NASA Ames Annual Space Settlement Design Contest, and it will need to be in a "poster-style" display format.
- The dimensions of the poster presentation should not exceed 1.0 meter (high) by 1.5 meters (wide) [59"x 39"].
- It is acceptable to have posters smaller than this size or to mosaic smaller parts into a larger sized poster.
- Models, flyers, or handouts are also allowed and may be displayed.
- No Computers or electrical displays are allowed. This is a security issue. The National Space Society is not responsible for lost or stolen computers.
- Access to electrical power to operate computers is severely limited and generally not available.

Students will be asked to two (2) hours at their poster to present details of their project to attendees; this is in addition to the planned 2-hour poster session.

We encourage you to leave a note or your contact information!

It is important that you send us your finished poster via e-mail to isdc.students@nss.org.

Please have the poster file be in PDF, JPEG or PNG format.

Note: Printing of poster is on your responsibility and should be printed prior to arriving in Los Angeles.
